MINING, BUSINESS AND STOCKS

ACTIVE STOCKS ON THE EXCHANGE

Tintic and Park City Traders Furnished the Features of The Week.

SILVER SHIELD ADVANCES.

Consolidated Mercur Stronger-Horn Silver, United States and Boston Con. Higher.

Tintic and Park City stocks were the most attractive stocks on the floor of the mining exchange this week. Silver Shield of Bingham was also played as a favorite and the stock advanced all of 100 per cent. Consolidated Mercui stiffened some, but no record of sales were reported. Daly was also inactive, the price remaining firm. A few shares of Daly-West came out at \$15, but the buyers were limited; there is not likely to be very much of a market for the stock until after the annual meeting. Horn Silver is quoted higher again on the strength of the extensive shipments of zinc ores inaugurated recently; but no stock is changing locally. May Day was the center of a little flurry during the week when the stock climbed up to 9 cents; only to be followed by a decline again. Developments at the mine do not indicate any change for the better. United States, Boston Consolidated were stronger in the bidding, but little stock was offered. New York Bonanza has strengthened and ends the week 10 cents above the opening sale price, closing with a transfer marked up at 50 cents a share.

Wabash closed lower. The closing quotations and sales of today were as

A FIELD FOR PROSPECTORS.

F. W. Vogler Thinks Southern Nevada is A Good One.

F. W. Vogler, the Montana stage man, who came in over the Salt Lake Route a few days ago from a trip to southetrn Nevada mining camps, where he went for the purpose of looking over the field with a view of establishing a stage line out of Las Vegas to Bullfrog and other districts, returned greatly impressed with the possibilities of that region. The country has some drawbacks, of course, but every place has its disadvantages in one form or another, but on the whole the region offers many attractions to the prospector

and the investor. As a field for the prospector Mr. Vog-ler considers it A No. 1. In fact, he declared, he cannot recall of ever having been in a country where a prospec-tor has a better chance to win out than he has in the unexplored mining region

f southern Nevada. Mr. Vogler does does not consider the country quite ripe for the establishment of a stage line, at least not until after the Salt Lako Route inaugurates regular train service through to Los Ange-

Maxfield Power Plant

Postmaster A. L. Thomas is in Boston oday on business, it is said, in connection with securing new power plant for the Maxfield Mining company, which is operating in Big Cottonwood canyon, i ably organize some time next week.

COMMITTEES OF STOCK EXCHANGE.

President Pollock Announced Them At Meeting of Governing Board Today.

APPOINTMENTS ARE GOOD ONES MAY CAUSE SOME CONTENTION

Will Meet the Approval of Every Member of Organization-Some Changes Proposed.

The governing board of the Salt Lake Stock and Mining exchange held a meeting during the forenoon, during which President James A. Pollock announced his committees which are to loook after the affairs of the organization during the ensuing year. In the selection of the committees the chief executive of the exchange consulted with other members of the governing board and undoubtedly the appointments will receive the hearty approval of every member of the organization. Better selections, it is conceded, could not have been made. The committees

Listing—J. B. Thompson, chairman; H. B. Cole, W. B. Andrew, T. Egan and A. L. Jacobs.

Arbitration—W. J. Browning, chair-man; G. T. Badger, R. J. Evans, W. H. Alexander and G. P. Norton.

Membership—M. B. Joseph, chairman; H. W. Doscher and M. S. Pendegast, Rules-J. Oberndorfer, chairman; E. G. Woolley, Jr., and W. H. Tibbals.

Arrangements—John W. Hatfield, chairman; W. H. Child, E. A. Hartenstein, E. M. West and J. L. Hamilton. The governing board has under consideration the changing of some of the rules of the exchange which, it is believed, are needed.

\$ THE MIDWAY STRIKE.

An Authentic Account of Tonopah's Lat-

One of the richest strikes ever recorded in Tonopah mines was the one made in the Tonopah Midway. From the Tonopah Sun an authentic account can be gleaned. The paper says:

The famous McDonald ledge, or one quite as good, has been struck in the Tonopah Midway mine. The mine now is looked upon as in every respect the equal of the Montana-Tonopah or the Tonopah Extension. In one streak the assays, from sources that are undoubt-active reliable, have been learned to av-erage \$500 per ton for four feet in width. The greatest kind of a sensation has followed the find. The news has sent Midway stock skyward and it is rapid-

going higher. The predictions that will reach \$2 in a day or two seem be well founded.

to be well founded.

A representative of the Sun visited the property last night and was informed by Foreman Ross Condon that the street rumors were not exaggerations. The story of the big strike is thus told by Mr. Condon:

"While driving the north drift on the 435 level five days ago we encountered a body of ore that we have to date pierced to a distance of nine feet and are not through the quartz yet. The rock in the face of the drift still shows

rock in the face of the drift still shows excellent values. "One streak in the ledge is from one

"One streak in the ledge is from one to two feet in width and carries \$1,600. For four feet another portion of the ledge will easily run \$5.00. The balance of the ore body is worth \$40 a ton. "It is probable that we are nearing the other wall, but there are chances that there will be another of the rich streaks before getting the country rock. "Tomorrow morning we will begin hoisting and expect to lift about 25 tons of the best ore. The temporary ore house is completed and we will at once begin sacking and shipping. By stoping after the wall is reached we will have a steady output.

have a steady output.
"The ore is an exact facsimile of one of the Montana-Tonopah ledges, and it is undoubtedly an extension. The values are at the ratio of on esliver. The ores are unoxydized as in the Miz-pah, but are in the form of unaltered sulphides. The wall is an andecitic porphyry. The ledge is an east and west one and dips to the north."

Going to the Deep.

The management of the Lower Mammoth Mining company has decided to seek the lower levels for pay ore, as a result of the examination of the Tintic property by Expert Newton Dunyon and Manager Sidney Bamberger a few days ago the edict has gone forth to sink the winze from the 1,200 to the 1,500 levels. The present lower workings of the mine contain some extensive bodies of low grade ore.

Copper Belt Shipments.

The Copper Belt has been a busy little road this week, says the Bingham Bul-Of coal, lumber, lime, etc, they hauled 53 cars and their ore haulage

Four Metals Directors. At the adjourned meeting of the shareholders of the Four Metals Mining company, held yesterday, a board of directors was chosen consisting of Leopold Hahn, H. Hart, H. H. Brandies, T. F. Moats, George L. Moats and Ed-win Brooks. The new board will prob-

FOR THE CONTROL OF SMELTER FUMES

Utah Consolidated Mining Company Files on Waters of Jordan River.

Proposed to Discharge Gaseous Leaden Waters Into the Great Salt Lake.

While no announcement to that effect has been announced it seems quite likely that the smelting companies operating in the Sait Lake valley have concluded that the only feasible means of eliminating the fumes-which have become a menace to growing vegetation in the Salt Lake valley, is by the use of a copious supply of water. The first evidence of this was displayed yesterday afternoon when the Utah Consolidated Mining company filed with the state engineer's office a claim for 25 second feet of water to be taken from the Jordan river near the smelter and to be conducted by an 800 foot pipe line to the smelter for use in the regulation and control of the poisonous fumes which have been complained of so much. The gaseous laden waters will be conducted into the Great Salt Lake, for final disposal there. This plan has given rise to numerous conjectures as to the possible effects of the waste water upon the waters of the lake. As the lake is in itself something of a chemical factory, the mixing of the smelter water with the salts in solution at the lake, it is surmised, may result in chemical combinations which with the state engineer's office a claim result in chemical combinations which or may not have a deleterious

TINTIC ORE SHIPMENTS. Old Undine Property Has Been Bonded To A. A. Kinnear.

Special Correspondence.

Eureka, Feb. 3,-The shipments from Tintic mining district for the week ending Feb. 3 amounted to 111 carloads, divided among the following properties: divided among the following properties: Centennial-Eureka, 48; Budon Beck, 4; Gemini, 16; Grand Central, 6; Mammoth, 6; Carlsa, 2; Lower Mammoth, 1; Victor, 2; Ajax, 1; Tetro, 2; Uncle Sam, 4; Eagle & Blue Bell, 6; Yank& Consolidated, 7; Hopes lease, 7; Eureka, Hill, 3. Total, 11. Two carloads of concentrates were shipped from the Uncle Sam mill.

Sam mill.

Work on the Prairie group of claims in West Tintic is progressing splendidly under the superintendency of N. N. Brown. Considerable ore is being taken from the property and the prospects are very bright for a good paying mine.

On Wednesday the force at the Eagle & Blue Bell mine was laid off to allow some repairs to be made to the com-

Development work was started on the Scotia property in West Tintic and will be continued all winter. A large amount of rich mineral has been taken from this mine in years past, and as development progresses it will no doubt add to the great output of Tintic.

add to the great output of Tintic.

The McKinley Mining company is now working two shifts in the tunnel of their property, and the showing grows better daily.

A large force of men are at work on the 350 level of the Scranton mine, lowered in the porth and of the district. cated in the north end of the district.

A large amount of ore is on the dump and two to four carloads are being

shipped weekly.

The recent strike in the Gold Blossom property in north Tintic, has caused the company to materially in-crease the working force. Development work is progressing rapidly with good

results.

A. A. Kinnear has taken a lease on the old Undine property at Silver City and also a bond and lease on the Windridge claims Nos. 1 and 2, which are a portion of the Undine property. A fine body of ore has been uncovered which will prove profitable to the leaser. The shaft on the property is down a distance of 350 feet and several hundred feet of drifting has been done in the mine. A large amount of rich ore was shipped from the mine in the palmy days of Silver City and there is no reason why with proper development work Mr. Kinnear should not make a bonanza out of the old producer. bonanza out of the old producer.

CONCENTRATES.

Judge Henry Shields of Park City was in the city last evening.

The Uncle Sam Consolidated has two loads of high grade ore on the market today. Manager Henry M. Crowthers of the

tinental Alta mines departed for Alta tis morning.

The annual meeting of the Pioche-Nevada Consolidated Mining company is scheduled for neext Monday.

The ore and bullion settlements reported late yesterday were as follows: Crude ore and concentrates, \$46,900; base bullion, \$33,300; gold bullion, \$6,300. The addition to the Winnemuck mill has been completed, the machines in-stalled in position, and the mill will be running full capacity by Monday,—

Bingham Bulletin. L. C. Branson, proprietor of the Tonopah Sun, has begun the publication of a daily paper at Goldheld, Nevada. The first issue came out last Wednesday, Success to the new enterprise.

C. J. Sherwood of Clark, S. D., and wife, were in the city yesterday and departed for California. Mr. Sherwoood is a shareholder in the Stockton Gold Mining and Mitling company at Stockton.

E. M. Reed, employed at the Bonanza mine in West Tintic, was the victim of a cave-in Tuesday and was so badly injured that he could not be brought to Eureka. On account of the heavy snow in that section a messenger did not arrive there until Thursday night.

Manager P. W. Madsen of the Century Mining company has gone to Park Valley property of that company, and while in camp will order the mill closed. It has been decided to devote all energy to the development of the mine for

Work in the great strike in the Silver Shield, which was reported several weeks ago, has been partially suspended, owing to the large workings. This has now been overcome by another upraise tunnel to the level of the ore boand the ore struk by a cross drift. ore body at this point was found to be equal to the first find. The trouble

For the week ending at noon, Jan. 30....\$ 558,913.43 \$ 844,941.40

Totals ...\$2,897,854.20 \$3,559,371.86 Decrease, \$751,515.66.

The storms of the past few days have been of a value beyond computing to local industries, and there is a more cheerful feeling throughout business circles on account of the rains and snows than for a long time past. The jubilication is especially evident in and around sugar circles, Advices from Lehi, Ogden, Logan, Garland, Idaho Falls and Sugar City are to the effect that last year's acreage of beets, superb as it was, will fall far into the shade before the record of 1905. The heaviest gains are booked at Garland and in the two Idaho factories, where the farmers are contracting in a way most gratifying to the sugar people, and the number of acres already signed up is beyond the most sanguine expectations.

snow; colder. West Wyoming: Partly cloudy tonight and Sunday with local snow; rising temperature.

BUSINESS MAKES STEADY PROGRESS.

Speculative Excesses of All Descriptions Have Been Well Avoided.

NO MAXIMUM OF ACTIVITY YET.

Traffic Blokades Have Disappeared and Distribution of Merchandise is On Liberal Scale.

New York, Feb. 3 .- Dun's Weekly Review of Trade tomorrow will say: "Business progresses steadily, all speculative excesses having been avoided thus far, and the numerous negotiations now pending indicate that the maximum of activity is yet to come. Some irregularity in reports for the first month were undoubtedly due to exceptionally severe weather. Taken as whole, receipts for January were very After various leaders had talter 3 or more below last night, buying became larger and the market began to retrace its course. United States Steel preferred rose to near 96 and Reading recovered to 95. Other stocks about made up their losses, D. & H. continued its boom of yesterday, bringing 196 before 11 o'clock. New Haven-advanced about 4 points, Michigan Central 6 and Northwestern and Tennessec Coal 1 to 14. Pacific Coast second preferred fol 14. much better than in the same month

last year, particularly as to failures. "Distribution of merchandise is once more on a liberal scale, traffic block-ades having disappeared and in many cases large clearance sales have been disposed of. Few labor disputes are interrupting work, although several new controversies are threatened. Manufacturing plants are making the best returns. Iron furnaces and steel mills operate close to their full capacity and the quarterly report of the leading concern showed an enormous tonnage of business on the books at the end of the year, despite the fact that the closing months of 1904 made very good exhibits.

good exhibits.

"Railway earnings for January were
1.1 per cent larger than a year ago,
and foreign commerce at this port
for the last week showed an increase
of \$970,980 in exports and a gain of
\$528,067 in imports. **So28,067 in imports.

"Commercial failures this week in the United States are 259, against 305 last week, 335 the preceding week and 246 the corresponding week last year. Failures in Canada number 30, against 33 last week, 34 the preceding week and 29 last year."
